## EXPERIENCE

### Senior Software Engineer

*Pareekshn, SPIWD*

June 2024 – Present

*Noida, India*

- Building scalable web applications; collaborating across teams to deliver secure, efficient, and user-facing features.

### Junior Software Developer

*Your Webstore*

July 2023 – April 2024

*Dehradun, India*

- Developed and optimized e-commerce systems, integrating backend services with frontend components and APIs.

## RECENT PROJECTS

### Survey Platform | *Spring Boot, ReactJs, MySQL*

- A platform for conducting government land lease surveys, with a Spring Boot backend, React web client, and Kotlin mobile app.
- Designed database and backend system for handling survey data, including functions for analyzing data and generating server-side Excel and PDF reports.
- Configured a headless browser (Playwright) within the server to render dynamically generated pages and generate PDFs for reports and documents.
- Created secure RESTful APIs (with AES-256 encryption and authentication) to power a role-based data analytics dashboard for multiple user groups, enabling real-time insights and reporting.

### Pareekshn Admin Panel | *Spring Boot, JSP, JavaScript, JQuery, MySQL*

- A back-office administration and operations platform for creating, scheduling, monitoring, and processing assessment results.
- Designed RESTful APIs and integrated user interfaces to manage exams, users, and results, improving overall platform usability.
- Optimized database queries and implemented real-time scoring logic for faster analytics and automated report generation.
